

## Contagious Blood Poison

Is the name sometimes given to what is generally known as the BAD DIS-EASE. It is not confined to dens of vice or the lower classes. The purest and best people are sometimes infected with this awful malady through handling the clothing, drinking from the same vessels, using the same toilet articles, or otherwise coming in contact with persons who have contracted it.

It begins usually with a little blister or sore, then swelling in the groins, a red eruption breaks out on the body, sores and ulcers appear in the mouth, the throat becomes ulcerated, the hair, eye brows and lashes fall out; the blood becoming more contaminated, copper colored spots and pustular eruptions and sores appear upon different parts of the body, and the poison even destroys the bones. S. S. S. is a specific for this loathsome disease, and cures it even in the worst forms. It is a perfect antidote for the powerful virus that pollutes the blood and penetrates to all parts of the system. Unless you get this poison out of your blood it will ruin you, and bring disgrace and disease upon your children, for it can be transmitted from parent to child. S. S. S. contains no mercury or potash, but is guaranteed a strictly vegetable compound.

Write for our free home treatment book and learn all about Contagious Blood Poison. If you want medical advice give us a history of your case, and our physicians will furnish all the information you wish without any charge whatever.

## They Are Hustlers.

(From the Paris Gazette.)

The rapidity with which the Bourbon Home Telephone Company constructed its plant in this city has been a source of wonder to the people generally. The underground work was done by local laborers under the direction of Mr. Humbert. While the metal of the street was being removed at one end of the line, the trench was being filled at the other end, with the conduits all in place and properly imbedded in cement. One of the underground branches extends along Fifth Street, in front of the postoffice. So, in order not to interfere with travel, electric incandescent lights, were strung over the street and the work done Wednesday night. By the time people went for their mail Thursday morning, the macadam was all back in place and workmen were in some other portion of the city. Work upon the Stromberg switchboard is being pushed by experts from Toledo, O., and within a week the Paris exchange will be in operation. It is the intention of the directors to throw open the doors of their offices for a day or two, to allow all who wish to see the wonderful workings of a modern, up-to-date switchboard. A directory will soon be issued, giving a list of the subscribers. The service will be as perfect as modern improvements can make it. There isn't anything known to the telephone world that tends to make conversations strictly private and absolutely distinct that the Home Telephone Company has not adopted. The directors are all Bourbon County men and the stockholders reside here and are taxpayers, and they propose to give their people the best service obtainable.
